THERMOBILE: The leaders in efficient Workshop Heating

Manual Ignition Bio Oil Heaters with Flue Kit

- Fast return on investment
- Efficient, virtually soot-free combustion
- Burns used oil, diesel or a combination
- Built-in fuel tank, filters & fuel pump
- Flame failure protection
- Overflow protection for burner dish
- Overheat protection (except Bio B)
- Includes complete flue kit (roof seal, fitting kit & two wall bands); legislation compliant PG1/1 (04)
- Bio Energy 2 & Bio Energy 3 Feature a burner draw system for easier lighting and cleaning plus a heat exchanger for higher efficiency

FLUE KIT INCLUDED

Model	Heat Capacity Min (Btu/hr)	Heat Capacity Max (Btu/hr)	Consumption (min)	Consumption (max)	Fuel Tank Capacity	Fan Capacity	Offer Price	5 year lease pw
Bio Energy B	68,000	102,000	2 litres/hr	3 litres/hr	50 litres	Radiant Heat Only	£1,252.20	£6.65

per week. 5 Year Term
Purchase from £1,252.20

These heaters also operate on these fuels:

- Bio Diesel Oil
- HVO
- Processed Fuel Oil (PFO)
- Rapeseed, linseed & some Vegetable oils

Manual ignition Bio Oil heaters must be connected to a suitable flue system (min height of 1m above roof apex & 6m above ground level). A full range of flue accessories is available.

Stainless Steel Flue Kit INCLUDED:

- Gives approx. 5.2m (17ft) ground clearance
- 4 x 1m flue pipes
- 1 x Terminal
- 2 x Adjustable wall fixing brackets
- 1 x High temperature silicone rubber roof seal & fixing kit for profiled or corrugated roof & cladding
- 1 Tee-Piece (flue to heater)
- Additional 1m flue pipe available

No space for a bulk fuel tank? PROHEAT is your solution!

PROHEAT Oil Fired Cabinet with built-in Fuel Tank

- Use with 28 second fuel (paraffin/kerosene) or 35 second fuel (heating oil/diesel)
- Low-noise radial fan
- Proheat 30 & 60: 240V
- Proheat 100: 400V
- Equipped with thermostat
- Capacities of 30, 64 and 97kW net
- 4-Sided adjustable outlet opening guarantees equal air distribution
- Summer/winter circuit for heating/ventilation

IT'S WHAT'S INSIDE THAT COUNTS

The FAG range of truck & trailer hub repair solutions are renowned throughout the industry for delivering quality, reliability and durability. They are designed to be an easy-to-fit replacement for the originally installed bearings, but with the added benefits of being preassembled, prepositioned, prelubricated and sealed for life.

They fit all popular commercial vehicle applications from DAF to Volvo, with all bearing types catered for, with solutions including Truck Axle Modules (TAM), Tapered Roller Bearings (TRB), Truck Hub Units (THU), plus the FAG proprietary technologies of Repair Insert Units (RIU) and SmartSET kits.

FAG has now added to the CV hub repair portfolio with the introduction of a range of Complete Hubs for trucks and trailers. The range offers:

- 100% Functional testing / automated torque testing
- 2 year unlimited mileage warranty
- Pre-assembled with FAG bearing solution and ABS ring
- Includes wheel studs and half shaft studs plus disc bolts as necessary

Eight part numbers are already in stock with a more comprehensive range available early next year.

**TRUCKSERVICES**

Launched in 2016, the TruckServices brand significantly expands Knorr-Bremse's portfolio for distributors, workshops and fleet operators. As the aftermarket brand of Knorr-Bremse, TruckServices provides vehicle owners, workshops and distributors with high-quality products and service solutions for commercial vehicles of all kinds and all ages.

truckservices.knorr-bremse.com

KNORR-BREMSE GENUINE NEW AND REMANUFACTURED ECONX® PARTS

Covering all major trailer parts including:

Brake Pads · Brake Discs · Brake Calipers · Brake Actuators
Trailer EBS Modules · Valves · Sensors · Cables

**KNORR-BREMSE**

LET'S TALK TEBS

Since 2001 Knorr-Bremse has been supplying EBS systems as Original Equipment (OE) to a wide range of trailer manufacturers. Over these 20 years, there have been just two variants. Generation One (TEBS4) which was fitted from 2001-2007 and Generation two (TEBSG2) from 2008-present. So, when it comes to identifying which EBS system you have, the age of the trailer is a good indicator. That is unless the trailer has undergone a retro-fit.

Pre 2007 Trailers will be equipped with TEBS4 (IAM replacement Module II39782N50 (new) or II39782X50 (Remanufactured)). Post 2007, TEBSG2 will be fitted. This is where confusion comes in. There are seventeen different OE references as the TEBSG2 system is further divided into three sub-system types; TEBSG2.0 (OE fit 2008 to 2010),

TEBSG2.1 (OE fit 2010 to 2014) and finally the TEBSG2.2 (OE fit 2013 to the present day).

In order to streamline supply and improve aftermarket support for replacement units, these references have been rationalised down to just five part numbers. So, in this case identifying which G2 system you have, the table provided will help identify the correct Module by part number. Since 2016 all of the TEBSG2 Aftermarket replacement modules have a silver top/lid to help visually identify them, as well as having "Service Product" embossed twice on the top of the module.

Still confused? Knorr-Bremse Technical Helpline in Bristol is available to assist on 0117 9846 222

Note: In all cases the Aftermarket replacement Modules once fitted require "programming". Trained operators using Knorr-Bremse diagnostic equipment and ECUTalk® software can operationally data mirror using the original parameter set from the original OE unit or OE source. Knorr-Bremse Technical Helpline in Bristol may also be able to assist and can be contacted by phone on 0117 9846 222.

101044

Cabin Tilt Cylinder
Volvo FH 16 (2012-), FH (2012-)

The new patented cab tilt cylinder febi 101044 gives way in the event of a crash and allows the cab to move backwards from its position. This means less deformation of the cab and the decreased risk of injury for the driver.

**171457**

Oil Separator
Volvo FH (2012-)

A Clean and High-Quality Solution

Oil Separators from febi in OE-Quality.

The Oil Separator is a low profile but technically challenging aid that contributes to reducing engine emissions. To keep up with market demand febi Truck's range of Centrifugal Oil Separators has been extended. We are now first to market with a full range for the European "BIG 7" manufacturers and supply OE quality from the Centrifugal Oil Separator market leader.

The Problem

Modern commercial vehicle engines must meet strict environmental regulations related to crankcase ventilation. The gases of the crankcase ventilation system result largely from the blow-by gas between the pistons and the cylinder liner, which are produced by combustion in the cylinder. This gas carries oil and soot particles which need to be kept within the crankcase. To fulfil this task, an oil separator is required.

The Solution

Oil Separators utilised in Euro 5 and Euro 6 engines work with centrifugal separation technology. Oil and soot particles are removed from the blow-by gas through centrifugal forces between 2,500 - 3,000 G at a separator speed of 7,000 - 9,000 rpm. The oil droplets get collected on the inner wall: From there, they flow to the floor of the separator before they are finally led back into the engine oil sump. This prevents unclean, ventilated crankcase gases from returning to the inlet of engines or being emitted into the environment.

OE-Matching Quality

febi Oil Separators are part of the febiPLUS range, which is made up of more than 250 OE matching quality components. The same OE quality standards apply for the entire febi Truck product line and are ensured by extensive, repeated product tests. Before any part is accepted into the range, detailed initial sample tests are carried out in the test laboratory at the company headquarters in Ennepetal.

Quality at Every Step of the Process

To ensure the consistent quality of febi Truck parts, extensive inspections of incoming goods are carried out by random sampling. These measures of quality assurance are not carried out solely for the spare parts produced in Ennepetal, but also for the components produced by carefully selected partner producers. Ferdinand Bilstein is continuously building partnerships with major OEMs and offers their first-class products in the spare parts market.

Selection of Oil Separators to fit Volvo Trucks:

febi No:	OE:	To Fit:
171457	22877306	Volvo FH (2012-)

YUASA

The YBX super heavy duty

- Premium choice for high power demands & end of chassis location
- Next generation enhanced flooded technology suitable for vehicles with Start – Stop systems or standard ignition
- For frequent overnight stays where hotel loads are applied
- High charge acceptance for faster charging
- End venting for remote exhaust of gases
- Lowest self-discharge rate for extended shelf life

- Designed for high performance vehicles with high power demands
- For regular overnight stays where hotel loads are applied
- Suitable for end of chassis location
- Fully maintenance free with sealed double lid
- End venting for remote exhaust of gases
- Lowest self-discharge rate for extended shelf life

YBX®5000 series

- Designed for vehicles with standard power demands
- For occasional overnight stays where hotel loads are applied
- Suitable for end of chassis location
- Fully maintenance free with sealed double lid
- End venting for remote exhaust of gases
- Low self-discharge rate for extended shelf life

YBX®3000 series

- Designed for vehicles with basic power demands
- Maintenance free with easy access lid plugs for topping up if required

End of Chassis

Mixing Device

Cycles

Applicable to working out hotel load frequency requirements, cycles are the number of times the battery can be discharged then fully recharged.

XVR extreme vibration resistance

Batteries with XVR have 8 times V4 vibration resistance.

Endurance

The ability to withstand repeated charge/discharge cycles to 50% depth of discharge without failure.

Mixing device

The built-in mixing device constantly mixes the battery electrolyte to prevent plate damage caused by stratification and significantly extends battery service life.

End of chassis location

The battery is built to withstand the extra vibration demands caused by end of chassis location. Failure to use a recommended battery will result in damage and premature failure.

Dayco Heavy Duty. Volvo Auxiliary Belt Kits.

“Volvo is one of the UK’s five major commercial vehicle (CV) brands and its vehicles can be seen daily, in various configurations, delivering goods and traveling the highways as they ply their trade throughout the British Isles,” explains National Sales Manager, Steve Carolan.

“The brand is therefore a regular workshop visitor across the country and one for which Dayco provides technicians with multiple replacement solutions, including auxiliary belt kits that in addition to the belt, contain all the rigid components (tensioners and idlers) necessary to successfully complete a full drive system overhaul.

“Although some of these kits are relatively straightforward and contain just a belt and a tensioner, for example KPV179HD, which was added to the aftermarket range in August and caters for the popular Volvo FH fitted with the 16-litre engine, some are far more comprehensive.

“To demonstrate this complexity, a combination of our six most popular tensioners feature in more than 30 Volvo auxiliary belt kits, so although many contain one belt and one tensioner as mentioned previously, two have one belt and two tensioners, five have two belts and two tensioners and eight have two belts and three tensioners – and this does not include kits that contain tensioners from outside our top six, which are used less frequently.

“As these examples make clear, rather than sourcing the components individually, it is far easier for workshops servicing Volvo auxiliary drive systems to simply order the appropriate Dayco kit, which is another example of how we can make a practical, real world, difference to CV workshops and their fleet customers.”

Dayco’s aftermarket expertise stems from its original equipment (OE) supplier partnerships, through which it manufactures belts, tensioners and idlers for heavy duty vehicle manufacturers, including Volvo, across Europe and around the world. As a result, in addition to its auxiliary belts, the Dayco range consists of 100 idlers and 140 tensioners, which cater for hundreds of individual applications.

For more information regarding the OE quality power transmission products in the Dayco range, please email: info.uk@dayco.com or visit: www.dayco.com

Leader in engineering and production of OE HD tensioners. OE HD belts designed for diesel grade HD applications. High performance and reliability. The preferred partner of the most important OE truck brands and engine equipment.
VOLVO, CNH-IVECO, MERCEDES, MAN, SCANIA, CUMMINS, CATERPILLAR.

TESTED TO THE EXTREME

Commercial vehicles are under intense strain and pressure as they are required to travel up and down the country. It's therefore crucial that only braking parts of the highest standard that have undergone stringent testing procedures are fitted, allowing full traceability and reliability.

Through its Textar brand, TMD Friction is constantly developing its product range to ensure it can offer products that customers can depend on, no matter the environment.

Braking is a safety critical product group, drivers and fleets need to have brake pads they can trust.

Textar part number 2927301 is one of many that demonstrates this. Specifically developed for Volvo and Renault applications fitted with the Elsa 225-3 Brake caliper. This part number utilises Textar's T7600 compound which offers excellent frictional stability and disc compatibility together with low wearing characteristics.

Textar compounds benefit from up to 43 raw materials and on average 38,400 hours are spent on road testing new friction formulas. As part of its extensive research and development; brake pads are put to the test on 300,000 kilometres on the road and test track. 11 terabytes of data are gained from dyno testing, noise testing analysis and thermographic analysis.

Further information on Textar's extensive range can be found in their revamped online catalogue system Brakebook. Brakebook contains cutting-edge catalogue data covering Textar's entire product portfolio and has been developed to positively benefit customers. It is free to access and helps them save time when trying to find the correct brake parts.

The Brakebook web-based catalogue system uses up-to-date catalogue data and offers user-friendly search options. Brakebooks' online platform not only mirrors the functionality of the TecDoc catalogue but is specifically designed to facilitate customer identification of brake parts.

Brakebook allows customers to create printable catalogues tailored to their individual requirements and in the desired formats.

Alongside the web-based version, the online catalogue is available via a free mobile app, which gives fleet operators, commercial vehicle workshops and truck racing teams an optimised version of Brakebook, available for both Apple and Android phones.

Like its web-based equivalent, the app shows images of brake product, enabling technicians to easily compare the measurements of a vehicle's pads or linings to the phone's reference. Also included is a barcode scanner, which brings up part reference numbers and further information on a scanned part.

With over 1000 part numbers, Brakebook is constantly being updated with new products. These regular updates ensure fleet operators and commercial vehicle workshops are provided with a simple one-stop solution, delivering expert knowledge and support through one easy-to-use platform. This helps to prevent users getting confused with a multi-screen service.

TO FIND OUT MORE CONTACT YOUR LOCAL BRANCH

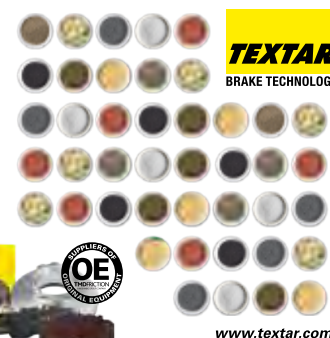

43 REASONS WHY

EACH BRAKE PAD IS SPECIALLY ENGINEERED FOR ITS PURPOSE AND VEHICLE, WITH SOME PRODUCTS FEATURING UP TO 43 RAW MATERIALS TO CREATE THE PERFECT FORMULA.

Expert attention to design and detail ensures the ideal balance between performance, comfort and longevity. Providing reassurance and confidence for your customers when they choose Textar.

This is one of the many reasons why Textar is trusted by vehicle manufacturers, distributors and workshops globally.

WINNARD

150 YEARS OF ENGINEERING EXPERIENCE

GREAT DEALS ON THESE POPULAR VOLVO PARTS

POPULAR DISCS

All our Brake Discs are manufactured to our specification by ISO TS16949 accredited factories with many references having ECE R90 approval. During the design process we also make enhancements over the Original Equipment part. These enhancements include improvements to the disc's thermal fatigue capabilities as well as reductions in corrosion of critical areas such as ABS teeth.

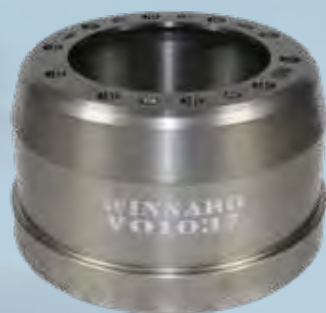

VO1071

VO1083

VO1037

VO1040

VO1042

POPULAR DRUMS

Our comprehensive range of over 2000 references have been recorded on our bespoke database, enabling us to cover over 99% of the U.K. vehicle marque.

Our growing range of European specific references and our extensive stock holding positions us as a prime supplier of Brake Drums for the Industrial, PSV, Truck, Trailer and Light Commercial Vehicles.

POPULAR PADS

Our evolving range of ECE R90 approved brake pads are designed to produce maximum performance at a cost effective price. Constructed using our triple retention system it ensures that the friction material can be relied upon, even in the harshest environments. The latest materials now include bedding in coatings to help ensure immediate braking performance.

WP174

WP174S2

DISC FITTING KITS

The majority of our brake pads are supplied complete with fitting kits, details available in our online catalogue but additional kits are available for service repair support. All brake pad fitting kits are supplied in axle sets.

In addition to our brake pad fitting kit range we also have a growing number of brake disc fitting kits and hub bolts.

SKF®

With close to 90% range coverage, SKF has you well covered for VOLVO trucks.

In view of even tougher competition in the commercial haulage sector, it is important to be able to depend on maximum quality and reliability in operation. SKF Truck Hub Units (THU) significantly reduce bearing failure resulting in higher uptime, improved tyre life thus saves service costs. SKF also offer a range of complete hubs for front and rear axle fitment. The pre-mounted assembly of bearings and hub also enable quick one-piece exchange procedures, ensuring easier and faster replacement.
